

WHAT IS CLAIMED IS:

1. A clip type orthodontic anchor, comprising:

piercing portions for piercing a skin and fitting a bone; and

a connection portion connecting the piercing portions to each other, wherein the connection portion biases the piercing portions toward the bone.
2. The clip type orthodontic anchor as set forth in claim 1, wherein the connection portion is substantially U-like shaped so as to bias the piercing portions toward the bone.
3. A clip type orthodontic anchor, wherein the anchor fits a surface of an alveolar bone on the lingual or palatal side, and fits a surface of an alveolar bone on the labial or buccal side, thereby being anchored to the alveolar bone.
4. A clip type orthodontic anchor, comprising:

piercing portions for piercing a skin and fitting a bone; and

a connection portion connecting the piercing portions to each other, wherein the connection portion biases the piercing portions so as to increase a distance between the piercing portions.
5. A clip type orthodontic anchor, comprising:

piercing portions for piercing a skin and fitting a bone; and

a connection portion connecting the piercing portions to each other, wherein the connection portion biases the piercing portions so as to decrease a distance between the piercing portions.
